Dear Parents/Carers

## RE: MEASLES, RUBELLA, CHICKEN POX, SHINGLES & TUBERCULOSIS

Please may we ask for your co-operation in an important matter?

We have children who are receiving medical treatment which puts them at risk if they are exposed to measles, rubella, chicken pox, shingles and tuberculosis. If these children are exposed to chicken pox they would need to be given intravenous medication if the disease develops. If your child is suspected of having chicken pox, measles or rubella please let us know immediately.

It is also important to let us know if there is shingles or tuberculosis in your household or close family.

Your child is not under any risk whatsoever from the situation. However, the health and wellbeing of our children, who are at risk, does depend on the co-operation of all other parents/carers and we hope that you will help us.

Thank you for your help with this matter.

Yours sincerely

Mr J Shawley  
Head Teacher
